

Portfolio Website

This is my personal portfolio website, built to present who I am, what I can do, and the projects I've worked on.

About Me

Hi, I'm **Badr EL HABBASSI**, a Computer Science engineering student at **ENSEIRB-MATMECA Bordeaux**. I'm passionate about software development, database systems, and machine learning.

This website is a place where I share my work, skills, and journey. I enjoy building clean, efficient, and user-friendly applications and constantly exploring new technologies.

Overview

This project showcases my **web development skills** through a responsive and well-structured website. It includes sections such as:

- **About Me** – A brief introduction and professional photo
- **Skills** – A categorized list of my technical abilities
- **Project Gallery** – Interactive cards displaying my personal and academic projects
- **Resume** – My education and experience, all in one place
- **Contact Form** – A simple way for people to reach out

Key Features

- **Responsive design** for desktop, tablet, and mobile
- **Interactive project cards** with tech tags and descriptions
- **Professional layout** using Bootstrap
- **Deployed on GitHub Pages** for easy public access

Technologies Used

- **Framework:** Angular
- **Styling:** HTML, CSS, Bootstrap
- **Languages:** TypeScript, JavaScript
- **Deployment:** GitHub Pages

Outcomes

- Created a central, professional platform for my online presence
- Improved my frontend development and UI/UX design skills
- Gained hands-on experience with Angular, Bootstrap, and GitHub workflows

Contact

You can reach out to me directly through the contact form on the website, or connect with me on LinkedIn or GitHub.
